1. Assembling the Base

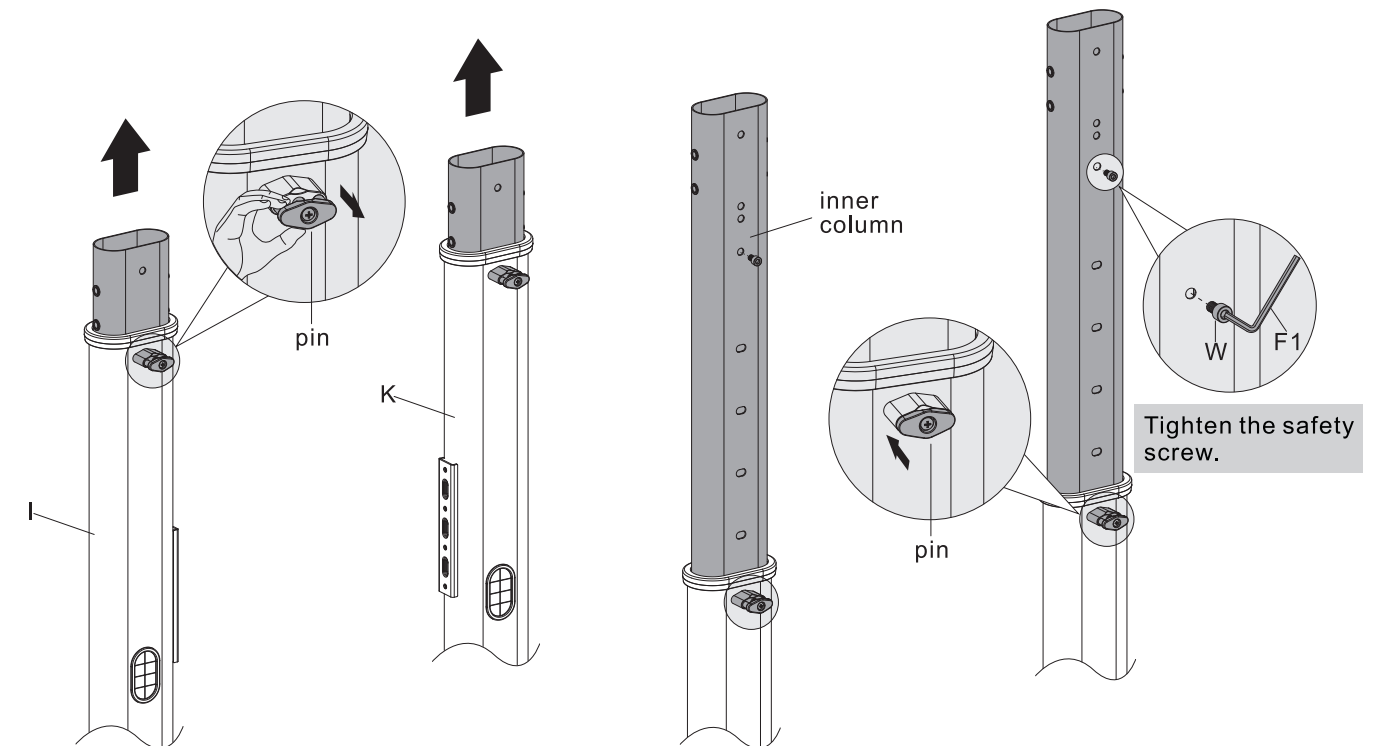

Insert the right base into the base. Align the holes on the right base to the holes on the base. Fix the base with the connecting plate and the screws. Repeat this step for the left base.

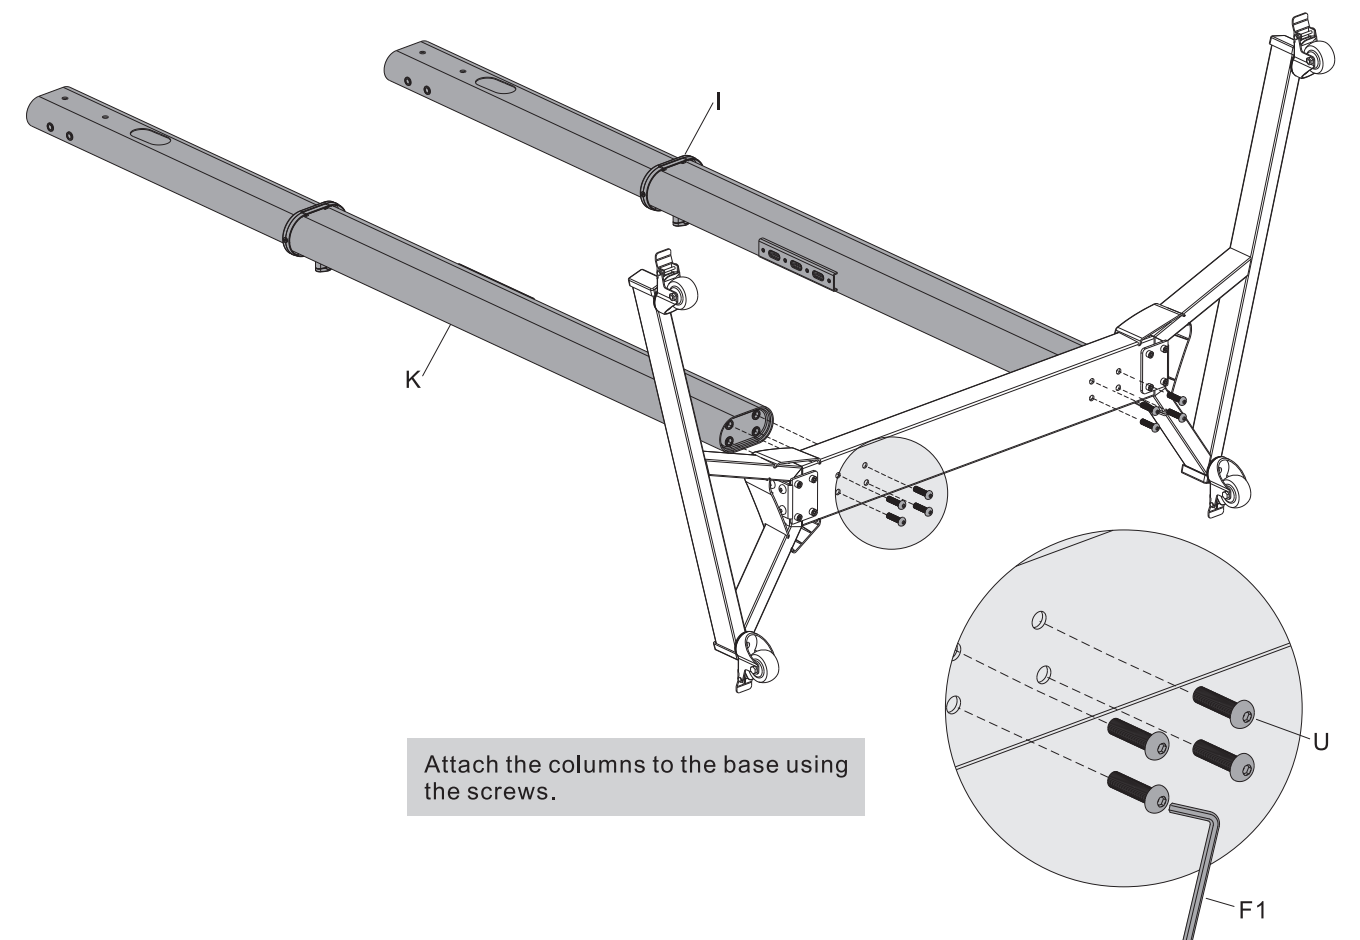

NOTE: Lock the brakes on the casters to avoid any unexpected movements during installation. Each caster can be adjusted independently for fine tuning. Slightly turn the nut to lower or raise the base.

2. Attaching the Columns to the Base

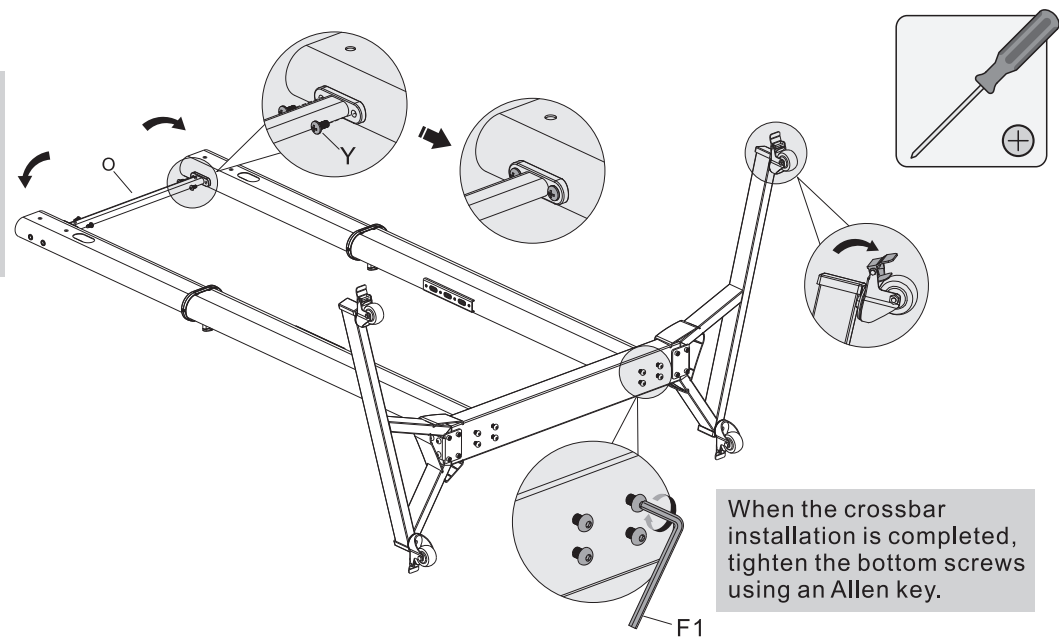

Pull the pin outwards and pull the inner column upwards at the same time, until the inner column is pulled to the desired height then release the pin to secure.

Attach the columns to the base using the screws.

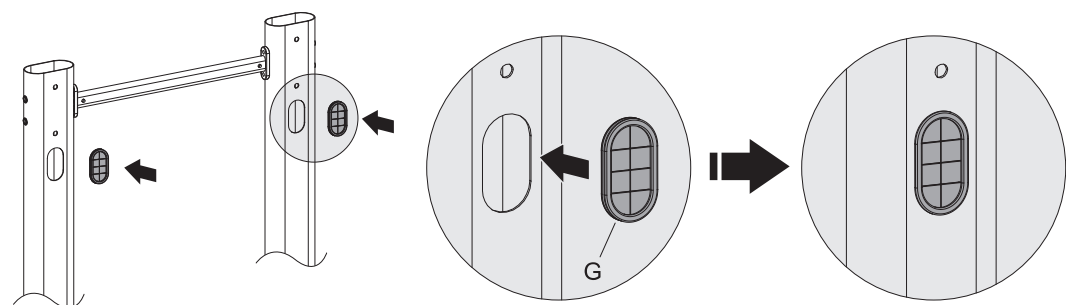

3. Installing the Crossbar

Attach the crossbar to the columns with the appropriate screws. Tighten all screws using a proper Phillips screwdriver.

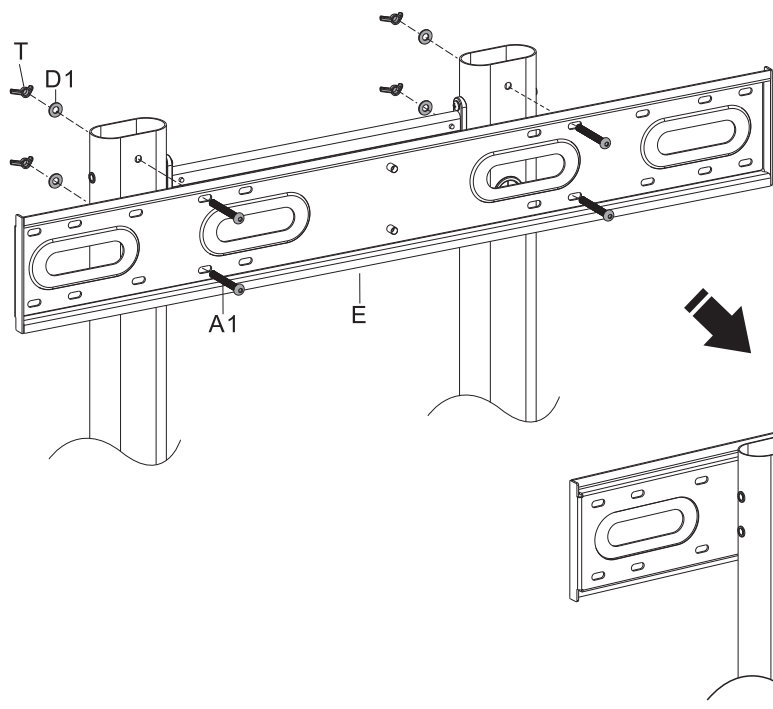

When the crossbar installation is completed, tighten the bottom screws using an Allen key.

4. Installing the Cable Covers

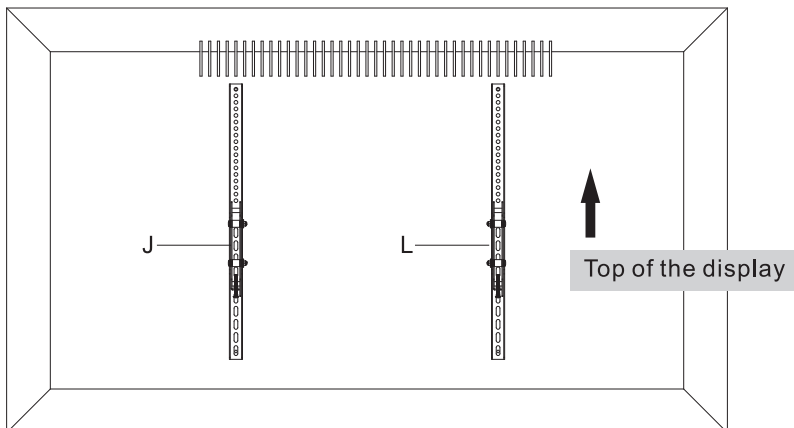

5. Installing the Universal Plate

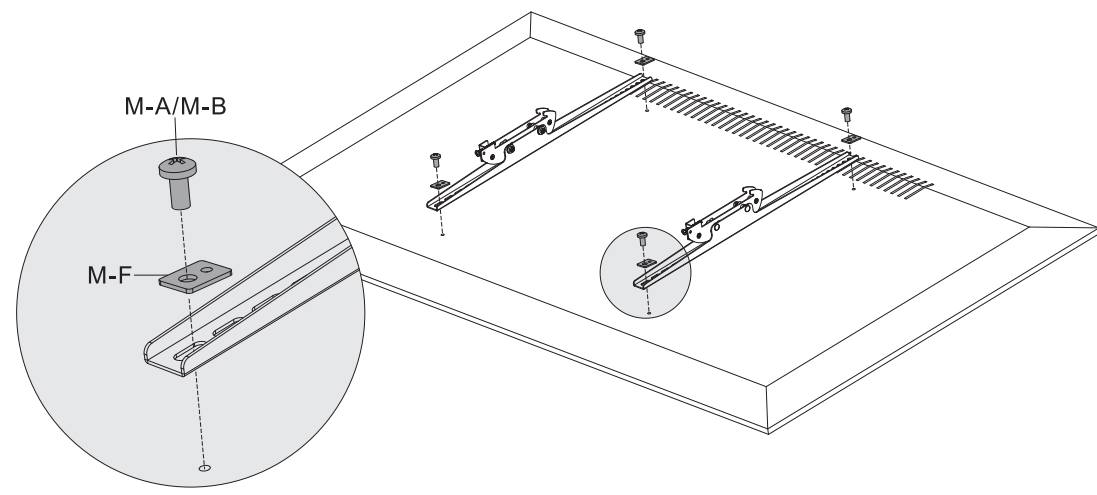

Attach the universal plate to the columns with the appropriate screws, washers and butterfly nuts. Tighten all screws and butterfly nuts.
